

# AMMA NEWS

*A Quarterly Publication from your Experts in Residential Steel*

## Why choose Amma?

There are so many good reasons why you should choose Amma (and our competitive price is only just the beginning). Here are 3:

**1. We are the (friendly) industry experts.** Expect to be pleasantly surprised when dealing with our team. We're available, approachable and actually return phone calls. As the industry experts we're happy to help you with your project and answer any questions you might have. Instead of leaving you in the dark, we communicate every step of the way. This is why owner builders love us.

**2. We get it right.** We understand that things can change on-site and things might not go exactly to plan. That's why we undertake a preliminary site-measure before the fabrication of any steel to make sure that we get it right. And while we're there, we walk through the plans to ensure the steel is how you want it. Save time and avoid stress.

**3. Fast turnaround.** Want it now? That's no problem. We are proud of our quick lead time and understand the demands of project management. And did we mention that all our steel is Australia made, sourced from local suppliers with a 15 year guarantee? Win-win.

## Colin comes on board

Amma would like to introduce the latest addition to our team: Colin Thomas. Having just recently moved from Queensland, Colin comes on board as our Estimator, Sales & Marketing. He brings 8 1/2 years experience as a structural steel draftsman. He has worked on a wide range of projects from residential, commercial, industrial and mining. Colin will be taking on our customer quotations, while juggling study in Marketing, Design and Management.

So next time you're calling (or walking) in, make sure you say hi.

## Welcome to our Newsletter

This quarterly publication will keep you up-to-date on the latest news from Amma Steel, industry specific articles and more. Enjoy!

## Celebrating 30 Years

This year Amma Steelworks celebrates a huge 30 years in business. The company was founded in 1985 by Manny Koronoes and Andrew Tanti. In 2012, Andrew retired and Manny assumed sole ownership. Since then, Manny has been working hard to take Amma to new levels. The company has continued to grow and improve, with the addition of an in-house drafting team, quotation team and project manager.

We take our mission very seriously: to be known as the experts in steel supply and fabrication, specialising in residential construction. Our goal is to exceed customer expectations and provide the highest quality of workmanship and service.

So what's next for Amma? We're just getting started and have many exciting developments in the works (so watch this space). We would like to say thank you to all those who have trusted Amma for the delivery of high-quality products and services. We look forward to the next 30 years as your experts in residential steel manufacturing.
